TO WHOM IT MAY CONCERN

It is a genuine pleasure and honor to recommend my student Aman Shrivastava for admission to your Institution. I am proud to express my thoughts about Aman who has shown an extraordinary achievement and deep passion for computer science. I have known Aman as a successful student for the last four years who has never left any opportunity without achieving excellence. With the deepest respect for my child, I am writing this letter of recommendation to bless him with a successful career.

From the beginning of the course, Aman was valued for his contribution, skills and sensitivity with which he presented his ideas. He is a very sincere and academically strong student with sufficient motivation to excel in his studies. He has achieved excellent results in computer science courses – passed all proposed tests, practical works and showed excellent knowledge of both practical and theoretical material. He showed great interest in the subject, was actively participating in the class and showed willingness and ability to study material beyond the limits of the curriculum. He holds exceptional knowledge in computer science as well as electronics. His interest in diverse areas and attitude of approaching every topic with an open mind is what makes him stand out from the rest.

Along the course, he had an excellent sense of perception about the basics of computer science and electronics and improving the flow from one subject to the other and one concept to another concept – all to the great praise of both the staff and the fellow students in his class. He is well-versed in concepts such as Logic Gates and Sequential, Operating System, Microprocessor and Microcontroller, Networking Technology, etc. He is a competitive programmer showing flexibility to code in several computer languages with an in-depth knowledge of Algorithms and Data Structures and Discrete Mathematics for computer science. He has dedicated his time to apply his knowledge and develop a variety of circuit-based, computer-based, robotics and software projects. I have found Aman to be an intelligent, conscientious, motivated and responsible student who masters theory-and applies it well in several domains.

Throughout his course of study, he has shown great interest in practical learning. I recall that Aman was a step ahead than most of his peers when it came to experimenting with his learnings and he was well recognized among the juniors. He actively guided them in their studies and projects whenever they approached him. He was always calm and composed, so the juniors always loved to interact with him. We engaged in several courses and research related discussions in which he has shown an innovative nature and ability to think from a non-conventional point of view. He began to re-define our expectations of a good student leader. He regularly discussed the subjects with his fellow students, brought in new ideas, and suggested better learning methods. He has proved to have a divergent, abstract thinking style, native intelligence and good problem-solving skills, along with good interpersonal skills and leadership qualities.

Aman is very firm and focused on his career goals. He has devoted his time to learn and master high-level concepts that are taught at colleges and universities. He consistently exhibits dedication and vigor in all that he approaches. He is a member of the Raman Science Centre and an emerging scientist from the Visvesvaraya National Institute of Technology. He has also been teaching at a computer institute and has helped establish a robotics workshop for young students. He has independently designed a do-it-yourself kit that allows students to build circuits and robots. He also invited students from the entire city to participate in science experiments and activities delivered by him at Twinkle Club annual festival, India's largest children's festival. His quality of inspiring young students is very delightful. At such an early age, he is a vital member of all that he is a part of. Aman is clearly an independent, active member of society who pursues personal interests.

Aman has also participated in national technical events and competitions since primary school. His passion for robotics was ignited at iLabs India, where he learned to implement microcontroller-based projects, autonomous and semi-autonomous robots. He worked on his research interests and college-level courses at Visvesvaraya National Institute of Technology. His hard work, dedication and commitment to follow his passion from an early age led him to victory at prestigious science competitions in India. He secured a national award at the AXIS Junior Scientist Model-o-thon competition for his project, "Unmanned Ground Vehicle with Vision for Remote Security and Surveillance," which was praised by DRDO scientists and published in the local daily. He also won the Best Project Award at the CBSE National Science Fair for his project," AudioOptic: A Computer Vision-based Wearable Visual Aid for Visually Challenged," which was nominated for IRIS Eastern Mentoring Camp and Jawaharlal Nehru National Science Mathematics and Environment Exhibition. Aman's achievements are unique, which exhibits the qualities of a leader and promising scientist who truly loves science and technology.

Aman has an immense passion for research and development. He has a brilliant and lightning-quick mind. He is a fantastic scientist, one with great charisma and leadership skills. Though he is very young but he has challenged himself to study difficult concepts. He has worked on brain mapping and presented his project, "iThink: An electroencephalography-based Brain-Computer Interface for Brain-to-Text, Brain-to-Speech and Brain-to-Command," which won at the IRIS National Science Fair. He secured the Da Vinci Engineering Enrichment Program Scholarship which was awarded to only one student in India. He presented his project to Dr. A. S. Kiran Kumar from the Indian Space Research Organisation. I have seen a keen urge in him to understand engineering concepts beyond the theoretical purview reflecting his potential for a research career. He is already performing in many ways at the level of a graduate student.

Aman has utilized his time well and is one of those exceptional students who have had an extraordinary life journey. He has assisted and mentored junior students to led them to victory at prestigious national competitions. Under his guidance, students have won the Council of Scientific and Industrial Research Innovation Award for Children, Dr. APJ Abdul Kalam IGNITE Awards and a few students also received an opportunity to represent India on International platforms. Aman also had the chance to represent India and participate in the DEEP Summer Academy at the University of Toronto. In the successive year, he also secured admission for Computer Science at the respective prestigious Institution. Though he couldn't afford to attend his dream university, he aspired to seek inspiration at the Indian Institute of Technology. He completed his first-year courses including Engineering Physics, Engineering Mathematics and Engineering Design. He also participated in the engineering festival at the top IIT's where he also managed to complete courses on robotics, cloud computing, machine learning, etc. Aman's desire to learn more than schools has to offer is one of his defining attributes. He is highly ambitious whose passion for learning and achieving great heights is just unstoppable. He presented his project, "EyeLink: Eyelink: An Electrooculography based Human-Computer Interface," for which he won at the Indian Science and Engineering Fair. He was also selected by the Department of Biotechnology, Government of India to participate in the Biotech

Innovation Ignition School. Aman truly impresses me as a student who actively seeks new experiences which support his love for science.

Throughout his journey, Aman has demonstrated the qualities necessary for high success in the demanding academic atmosphere of a high caliber university. Aman exhibits the qualities of a leader as well as a great scientist who has had ample research experience and excels academically in challenging college-level courses. He is an intelligent, well-rounded, and grounded individual who challenges himself and actively seeks new opportunities and experiences. He has the determination, maturity, and intelligence to succeed in any endeavor. His academic and personal achievements show that he is committed to his education and will work hard to achieve his goals. He is a highly motivated individual with a thirst for knowledge. Aman is one of the most extraordinary students I have encountered in my teaching career. I have the deepest personal and professional respect for him, and I sincerely believe Aman would truly be a superior addition to the student body at your prestigious University. With sincere conviction, I recommend that Aman Shrivastava be selected for higher studies at your esteemed Institution. He has my highest endorsement for admission into his desired course at your University. If you have any questions about this recommendation, please do not hesitate to contact me, for I will gladly try to help.

Sincerely,

Mr. Navin Fulzele

Computer Science Faculty [B.Sc, M.Sc]
