LETTER OF RECOMMENDATION

To Whom It May Concern:

In the capacity as the Principal of St. Paul Junior College, Nagpur, I have known Mast. Aman Shrivastava to be one of the extraordinary students I have come across in my years of education career. As her school principal, I have witnessed the exceptional contributions that Aman has made to our school. I first met him in 2017 when he secured admission to our school. Also, I have had the opportunity of teaching him English Literature in his eleventh and twelfth grade. Based on our association, I consider him to be one of the most diligent and perseverant students as he has performed to his utmost capability throughout his tenure in the school.

Aman has been a record-breaking star in the city. He has not only accomplished laurels in research and innovation but also arts and sports. He has been a winner at the National Science Fair held by the Central Board of Secondary Education. It is a remarkable achievement as only eighteen projects throughout India gets a chance to be a winner. He has also been awarded in Taekwon-Do competitions held at the regional and national level. His impeccable caliber, hard work and dedication have led him to achieve national recognition. I can attest to the motivation that Aman possesses.

Aman exudes self-confidence and has consistently demonstrated a strong work ethic and dedication towards his academics. Moreover, he always participates in class discussions, believing that ideas stem from discussions and brainstorming. Thus, Aman always plays the initiator of fruitful discussions in the classroom, from which his peers also tend to gain immensely. Aman is a very bright and down-to-earth person as he shows genuine concern and respect for others. He is truly special for his compassion and commitment for helping others.

Aman has the highest appraisal for his innovative bent of mind. He is academically motivated, but more importantly, he readily seeks knowledge and strives to prepare himself for challenges and opportunities. He has been affiliated with Visvesvaraya National Institute of Technology and Raman Science Centre to develop his capacity for a research career. He secured another national award at the prestigious IRIS Science Fair and gained a scholarship from the University of Toronto. Aman has earned a reputation of winning national awards with panache and flair for excellence.

Aman's resilience, positivity, and humor are especially astounding, given the challenges that he has recently overcome in his life. Even though her grandmother's demise, he secured an exemplary score of 98.2 percentile in the Joint Entrance Examination. He also secured admission for B.Sc. in Computer Science, Mathematics and Statistics at the University of Toronto. He was entitled to the University of Toronto International Scholarship: India 2019.

Despite the family and financial hardships, he continued his pursuit for excellence and academic prowess. Aman studied several courses at the Indian Institute of Technology seeking guidance and motivation for his further career. He was one of the forty students to get selected nationally for the Biotech Innovation Ignition School organized by the Biotechnology Industry Research Assistance Council, Government of India. He also bagged Gold and Bronze Medal at the Indian Science and Engineering Fair. It is evident from his participation and achievements that he has a great passion for science and engineering.

Unwilling to settle for any less, Aman aims to pursue his undergraduate studies in an international institute. I am incredibly proud of my student to keep up the spirit for his passion and education. It is explicitly clear that Aman is a gifted child and one of the few top students in the country. In conclusion, I would like to say that considering Aman's penchant for achieving excellence in whatever he undertakes, I believe that he is one of the ideal candidates for pursuing under graduation at your prestigious University. Thus, I extend my whole-hearted recommendation for his candidature for admission into the undergraduate course at your revered University. I wish him all the luck for his future endeavors.

Your Sincerely,

Dr. Dewagana Punde
